Description

Rockets

Applications

**For long range distress signalling on ships, lifeboats and life rafts.
The best signal for use in offshore kits for pleasure craft.**

Design and function

A launching tube with clear instructions and a non-slip surface ensures safe operation even when launched with one hand. The IKAROS parachute rocket is waterproof and can be held under water in the ready-to-fire position.

General

The IKAROS parachute rocket was introduced in 1959 and its design is now used by most manufacturers around the world. IKAROS is the leading parachute rocket on the market with quality and performance that meets the highest demands on functionality and safe operation. It is approved globally and conforms to the latest SOLAS 74/96 regulations.
