Description

Daniamant is proud to present a new external Lifeboat Light to add to its range. Previously supplied and manufactured by Jotron (Part No. 86240).

The SL-400 is a high quality external Lifeboat Light designed to build on the very successful Rescue Master range that is still produced today.

It is designed to be fitted on motorised survival craft and to be connected to the craft's 12v electrical system.

The SL-400 Lifeboat Light uses the latest advances in LED technology. It features very low current consumption and enhanced reliability.

The product comes with a standard 3 metres length of cable which can be cut down to suit the craft's requirement. Longer lengths may be available on request.

Installation

Use stainless steel screws, mounting must be on a flat surface to prevent water-ingress.

Connect the cable to the external power-supply (12-24v DC), observe correct polarity.

Dimension details can be found on our Technical Data Sheet.
